

Bob Aldous MA Born 1960

My work covers a wide range of artistic disciplines, painting, poetry, performance and installation projects. .

I uses abstract imagery- usually relating to the movement and actions of water and have developed a unique technique of painting on silk which combines the use of acrylics, ink and watercolour. The delicacy of the silk providing the ideal canvas for my multi layered approach.

The theme of the artwork often uses the combination of opposites- such as light - dark, love - death, movement - stillness. This dynamic is a common thread that lies behind all my artwork. I have always been fascinated by the ability of painting to depict spacial depth. In my more recent works this has led to broaden the spacial range from the depiction of immediate tactile sensation to the allusion of infinite space.

Training

BA in Fine Art Ravensbourne college of Art and Design
MA in Creative Entrepreneurship- University of East Anglia
